SKILLS

- Full-Stack Development
- Cloud Computing
- Serverless Architecture
- API Development
- DevOps and CI/CD
- Problem Solving and Troubleshooting
- Team Leadership and Collaboration
- Communication and Technical Writing
- Agile Methodologies
- Networking and Infrastructure
- AI and Machine Learning

EDUCATION

Bachelor's degree,
Computer Software Engineering

Faculty of Information
Technologies, University
"Džemal Bijedić" in Mostar

2020 – 2024

During my studies at the Faculty of Information Technologies, I acquired a solid foundation in computer software engineering. The program provided comprehensive knowledge in various areas, including programming languages, software development methodologies, database management, and computer networks.

PROFILE

I am a highly skilled and experienced software developer with a passion for technology and innovation. With a proven track record of delivering high-quality code and developing innovative solutions, I constantly seek out new challenges and opportunities to grow my skills. My expertise spans across various areas such as React, infrastructure, databases, and AI, making me a valuable asset to any software development team.

I have a deep understanding of top programming languages and technologies, including but not limited to React, JavaScript, C#, .NET Framework, Azure Kubernetes, and Azure Pipelines. My extensive experience with React has enabled me to build dynamic, user-friendly interfaces and deliver robust front-end solutions that integrate seamlessly with backend systems, exceeding both company standards and customer expectations.

As a team leader, I possess excellent leadership and teamwork abilities. I motivate and inspire team members, instilling positive energy and maintaining focus on achieving project goals. I am characterized by my kind-hearted approach and willingness to help others, ensuring a collaborative and supportive work environment.

In addition to my technical skills, I have strong communication skills, allowing me to effectively collaborate with cross-functional teams and stakeholders. I am adept at translating complex technical concepts into clear and concise language, enabling effective communication and understanding.

I am committed to continuous learning and staying up-to-date with the latest advancements in the field, particularly in React and related front-end technologies. I actively seek out new opportunities to expand my knowledge and skills. I am passionate about using technology to solve complex problems and improve the world around me.

Overall, I bring a wealth of skills, knowledge, and a strong work ethic to any software development project. I am dedicated to delivering top-quality work, exceeding expectations, and making valuable contributions to the success of the team and the organization.

All my references and recommendations can be found on my LinkedIn page, as well as endorsements.

WORK EXPERIENCE

Software Developer

Homesourcing

Mar 2022 - Present · 1 yr 5 mos

I had the opportunity to work with a talented team from Europe, where I refined my skills in team organization and management. I played a key role in numerous projects, utilizing React for front-end development and .NET for backend solutions. These projects involved building dynamic, scalable web applications and ensuring seamless front-end and backend integration. The front-end applications were deployed as static web apps on Azure, ensuring high performance and scalability. Additionally, I modernized and resolved issues in the payment system implementation for legacy mobile applications built in .NET, catering to Norwegian clients. This role further demonstrated my proficiency in delivering robust and efficient solutions using React and .NET.

Overall, it was a highly rewarding experience that allowed me to apply and expand my expertise in software development.

HAMZA ABDAGIĆ

SOFTWARE DEVELOPER

WORK EXPERIENCE

Software Developer

Freelance

Feb 2022 - Present · 1 yr 6 mos

As a developer, I have had the opportunity to work on a wide range of impactful and diverse projects. I developed a unique dating app for a UK client targeting Spain's exotic nightlife destinations, leveraging common interests and locations to create meaningful matches. I also built a testing platform for a non-profit organization to assess high school students' knowledge in economics. Additionally, I have delivered various web applications for clients across Europe, utilizing React for modern, user-friendly interfaces and .NET for robust backend solutions. My work also includes updating legacy systems to .NET Core, enhancing performance and scalability. These experiences have further solidified my expertise in delivering high-quality, tailored solutions for a variety of industries.

Software Development Team Lead

IdentityWorkX

May 2022 - July 2023 · 1 yr 6 mos

As a team leader at IdentityWorkx BV, I led a talented and motivated team, fostering a collaborative environment that promoted knowledge sharing and personal growth. I played a pivotal role in innovation by developing prototypes, contributing to R&D, and taking full responsibility for designing project architecture and creating comprehensive documentation.

Leveraging React, Vite, and MUI, I spearheaded the development of a modern UI for a major client. This new interface served as a platform dashboard to control a widely recognized Identity and Access Management (IAM) solution, demonstrating my ability to deliver cutting-edge, scalable solutions tailored to client needs.

Software Development Team Lead

IdentityWorkX

May 2022 - July 2023 · 1 yr 3 mos

During my tenure as a Senior Software Developer at IdentityWorkx BV, I played a key role in developing a cutting-edge, cloud-native, multi-tenant IGA (Identity Governance and Administration) software solution. This exciting project provided opportunities to leverage my expertise in both React and .NET, where I contributed to the creation of dynamic, user-friendly interfaces and robust backend services.

A significant part of my work involved designing and implementing NoSQL databases and architecting a microservices-based solution with a strong focus on high availability. I also developed a customized, high-performance version of ASP.NET Core Identity specifically tailored for NoSQL databases, ensuring full compatibility and robust security standards required by the IGA domain.

In addition to my backend contributions, I played a central role in building modern React-based front-end solutions, improving the user experience and streamlining the platform's interface. I collaborated closely with my team on developing a variety of APIs, enhancing the capabilities of our IGA solutions.

The project exposed me to modern technologies such as Kubernetes, Docker, CI/CD pipelines, and automation, which I integrated with both React and .NET to build scalable and efficient solutions. My time at IdentityWorkx BV was an enriching experience that allowed me to expand my technical expertise and work in a dynamic, fast-paced environment.

SOFTWARE DEVELOPER

WORK EXPERIENCE

Software Developer

Gate21

Nov 2021 - Feb 2022 · 4 mos

During my time at Gate21, I focused on developing Autodesk Maya plugins for 3D modeling and animation. This experience allowed me to gain valuable expertise in the domain of 3D computer graphics. Collaborating with leading experts in the field, I had the opportunity to learn from their knowledge and experience, further enhancing my skills.

In addition to the 3D graphics work, I took the initiative to build a role-based access control (RBAC) security system from scratch. This robust and customizable solution proved to be instrumental in enhancing project security and access management. Overall, my tenure at Gate21 was a productive and enriching period, where I honed my software development skills and contributed to innovative projects in the realm of computer graphics.

Software Developer

Authority Partners

May 2021 - Sep 2021 · 5 mos

During my tenure as a Software Developer at Authority Partners, I had the privilege of collaborating with a global team to deliver high-quality code. Our work process emphasized unit testing, code reviews, and continuous integration to ensure top-notch results.

I contributed to both back-end and front-end development, playing a versatile role in the project's success. A notable outcome of my work was the development of expertise in SQL databases, as I engaged with them daily. This experience enriched my skills and knowledge in the realm of SQL databases, proving to be a valuable asset during my time with the company.

Software Developer

Glasfaser Connect GmbH

Oct 2019 - May 2021 · 1 yr 8 mos

During my tenure at Glasfaser Connect GmbH, I demonstrated exceptional software development skills and leadership, consistently delivering high-quality code with a focus on React and .NET. I set a new performance standard for the team, driving both quality and efficiency.

A significant achievement was developing a unique navigation and underground utility system for GPS-accurate mapping, along with map-making software for telecommunications grid planning. I utilized React for the front-end and .NET for the backend, ensuring seamless integration and high performance.

Additionally, I engineered a scalable, high-performance SQL database, optimizing data handling for our applications. My experience with React and .NET, combined with Azure DevOps, further honed my technical and leadership abilities.

I'm proud of the impact I made at Glasfaser Connect and confident that my expertise in React and .NET makes me a valuable asset to any organization.

WORK EXPERIENCE

Software Developer

Zerick

Apr 2019 - Oct 2021 · 7 mos

During my time at Zerick, I had the opportunity to contribute to a diverse range of projects encompassing emerging technologies. I actively participated in projects related to Augmented Reality (AR), Virtual Reality (VR), Machine Learning, and Web Development.

In the realm of AR, I played a key role in developing multiple applications utilizing cutting-edge technologies such as Google's ARCore and Apple's AR Kit, enabling immersive and interactive experiences for users.

Additionally, I undertook the creation of a Machine Learning software from scratch and seamlessly integrated it into existing systems, enhancing the capabilities and performance of these systems.

Furthermore, my involvement extended to the development of various .Net and .Net Core applications. During this process, I prioritized high levels of performance and reliability to ensure the success of these projects.

My time at Zerick provided me with valuable experiences in working with emerging technologies and honing my skills as a versatile software developer. The exposure to diverse projects has enriched my expertise and prepared me to embrace new challenges in the field of software development.

RECOMMENDATIONS

Reiner Feldkamp, Solution Architect IT Standards and Solutions at Atlas Copco:

Hamza was part of the project team to develop and improve Azure Kubernetes infrastructure, Azure pipelines, and adapt a Service Now plugin. The leadership and teamwork were very good, resulting in reaching the goals and dynamically building solutions that could be reused. He shared his knowledge and experience, significantly contributing to the project. His overall IT knowledge made additional valuable contributions to the project.

Bart Van Kildonck, Head of Large Projects at Orange Cyberdefense:

Hamza has proven to be a true asset on the project I've worked with him. As a software developer, he brought a wealth of skills and knowledge to our team. He made significant contributions to the project, including the development and improvement of Azure Kubernetes infrastructure, Azure Pipelines, and the ServiceNow plugin. Hamza's leadership and teamwork abilities were exceptional, and his expertise in SQL and PowerShell was incredibly valuable. He is also always willing to share his knowledge and experience in networking and software. I highly recommend Hamza for any future endeavors and am confident that he will continue to make valuable contributions.

Nuriëlla Simons, Change professional & Coach:

Hamza is a committed, driven, and highly skilled software developer who masters the top programming languages. With experience in multiple areas such as infrastructure, databases, and AI, Hamza is a real asset to every software development team. He delivers top-quality work and consistently goes the extra mile to exceed company standards and customer expectations. I am impressed by his work ethic, communication skills, and willingness to help others. As a team lead, Hamza is characterized by his kind-hearted and motivating approach. He instills positive energy in every team member while keeping everyone focused on achieving their goals. It has been an absolute pleasure to work with Hamza! Keep up the good work!

HAMZA ABDAGIĆ

SOFTWARE DEVELOPER

TO WHOM IT MAY CONCERN,

I am Hamza Abdagić, a highly skilled software developer with a strong passion for technology and innovation. With a proven track record of delivering high-quality code, I have consistently developed innovative solutions across various projects.

As a team leader, I collaborated with a talented group to develop prototypes and contribute to R&D. I took pride in writing detailed project architecture and documentation, showcasing my technical writing skills. Additionally, I have been self-employed, working on diverse projects, including developing a unique dating app for UK clients targeting Spain's nightlife and a testing platform for a non-profit organization assessing students in economics. I've also worked on web applications for clients across Europe and contributed to updating legacy systems to .NET Core.

My experiences at Homesourcing, IdentityWorkx BV, Glasfaser Connect GmbH, and Zerick have allowed me to gain expertise in a wide range of technologies, including React, .NET, NoSQL databases, microservices, and Azure Kubernetes. I'm dedicated to continuous learning and actively seek new challenges to expand my skill set.

The recommendations I've received reflect my dedication, strong work ethic, and collaborative approach. As a team leader, I focus on fostering a positive, collaborative environment and ensuring success through team cohesion.

I am excited about future opportunities to bring my expertise to new projects. Feel free to contact me at hamza.abdagic@outlook.com or visit my LinkedIn profile [here](#) for more information.

SINCERELY,

A handwritten signature in black ink that reads "Hamza Abdagic". The script is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
